Description

Penair C5575 is a state-of-the-art, low voc, heavy-duty cleaner that has been thickened in order to cling to vertical and overhead surfaces. The gel properties of *Penair C5575* allow it to be applied to soiled surfaces without product runoff. This allows for an increased contact time, which results in better cleaning performance, decreased labor and reduced man-hour requirements. *Penair C5575* will not harm aircraft paints and is non-corrosive to aerospace metals.

Use Directions

Apply *Penair C5575* undiluted using pressure spray (use coarse spray only), foam equipment, or bucket and brush. Allow product to dwell 5 to 15 minutes, brush if necessary, then spray with fresh water to rinse. Brush, then rinse again to completely remove cleaner.

Specific uses

- *Engine carbon streak cleaning
- *Tail boom soot removal
- *Gunship blast residue removal
- *Landing gear and wheel well degreasing

Non Aircraft Uses

- *Combat vehicle engine bay cleaning (M-1 tank included)
- *Degreasing engines and transmissions

IMPORTANT: Before using *Penair C5575*, always be sure to read and follow warnings and directions for use appearing on the product container label, SDS and applicable current technical manual.
